

Deploying Your Contracts for Free on the Superchain

This tutorial walks you through the process of verifying and deploying your contracts on the [Superchain Developer Console\(opens in a new tab\)](#) and claiming your deployment rebate.

Prerequisites

- You must have signed up to the [Superchain Developer Console\(opens in a new tab\)](#)
- before deploying your contract(s)
- You should have a [Coinbase Verification\(opens in a new tab\)](#)
- linked with your Superchain Dev Console account

Launch for free

Get your Coinbase Verification

Coinbase Verifications leverage the Ethereum Attestation Service to enable the issuance of Coinbase-verified, onchain attestations. If you already have a [Coinbase Verification\(opens in a new tab\)](#) , proceed to the next step.

- To get your verification, go to the [Coinbase Verification\(opens in a new tab\)](#)
- page and clickGet verified
- .
- Login with your Coinbase account and go through the Coinbase Verification flow to get your preferred public key verified.

Link your wallet on the Superchain Dev Console

- Once you have your Coinbase Verification, go the [Superchain Developer Console\(opens in a new tab\)](#)
- and login with your preferred email.
- Select the account drop down and clickWallets
- . ClickLink wallet
- , and follow the connect wallet flow to link your public key that has a Coinbase Verification to associate your public key with your Superchain Developer Console login.

Verify your contracts on the Superchain Dev Console

- Once you have linked your wallet to the [Superchain Developer Console\(opens in a new tab\)](#)
- , click the banner forLaunch anywhere in the Superchain for free
- .
- In the contracts section, add your contract address, deployment transaction hash, deployer address, and select the chain you deployed on.
- ClickVerify
- , and proceed with proving ownership of the contract deployment.

Claim your deployment rebates on the Superchain Dev Console

For this first iteration, the rebate will be claimed on OP Mainnet. In the future, it will be possible to claim rebates on any chain in the Superchain. * At this point, your contract should successfully have been added to your Superchain Dev Console account, and if eligible, you can claim your deployment rebate. * To proceed, clickEligible for rebate * . * To complete claiming your deployment rebate, ClickClaim rebate * .
