

I was listening to Vitalik on Lex Friedman' podcast talking about MEV.

[

If PoS leaves room for stakers to extract more economic value than simply getting rewards, then Lido could increase rewards by implementing MEV strategies.

Curious what the thoughts are around this:

- How could the DAO pick or decide on MEV strategies?
- Is it ethical to run MEV strategies?
- If MEV strategies are implemented, what could be the potential increase in rewards?
- What are the risks with implementing MEV strategies
