

Hi over 284 days ago I been trying to recover my funds my ethereum was staked with lido I accidentally transferred to my eth wallet on Coinbase without installing and now 1.4 ethereum GONE !! My cpa is a fraud specialist and told me to reach out to you first , I've tried so many times to get help last time nothing you can do and one dev said it was a transcript error and can be recovered I went through the recovery process did everthing correct triple checked passwords to no prevail , my ethereum is somewhere I have the transaction code and sent address how can you help me recover it ? Can someone please help me , my mother is going through chemo treatment for cancer I'm helping her pay her mortgauge along with mine and her property taxes while sick and really could uses these funds right now
