Nomination Statement

Concise statement on why you are running for the Special Council

Having spent the vast majority of my professional life in highly regulated TradFi institutions, including being a committee/board member responsible for the governance and oversight of regulated platforms, I am keen to bring my years of experience within operational frameworks to web3. More recently I have been an active DAO participant and have come to understand the areas which require the most support and vehemently believe that I can affect positive change within the foundation.

Motivation

Details on your motivation for becoming an ApeCoin DAO Special Council member

I have seen the good that the ApeCoin ecosystem has done and continues to do. My ardent belief is that we are only scratching the surface in terms of how and where ApeCoin can be utilised and I wish to be part of an esteemed group of councillors helping to facilitate meaningful initiatives for the broader community.

Rationale

Share relevant experience and skills that will bring value to the ApeCoin community

I have many years experience sitting on Oversight Committees, Diversity and Inclusion Councils and Leadership Councils for some of the largest names in finance. These positions - of which I am tremendously proud to have held - have shaped me into the objective, fair and balanced decision maker that I am today. I believe that I can, in conjunction with fellow Council Members, deliver meaningful, transparent and trust-based outcomes for the ApeCoin community.

Specifications

Further describe relevant experience, including crypto and governance participation, and/or ideas for DAO improvement

My time served as Oversight Committee Member (a voting position) within a large US bank saw me involved in governing the operations of an MTF (a regulated trading platform) on behalf of it's members. A relevant example of governance would be receiving product enhancement requests from members and following the proper decision making framework for delivery (acceptance) or not (rejection). Alternatively, I'd often receive proposals from regulators and industry bodies with recommendations that could impact our member base - again, this would require careful consultation and due process.

I am drawing parallels in this example between running a venue on behalf of members and running a DAO on behalf of holders.

Concluding Statement

Summarize your statement as to why you are the best choice for Special Council

I believe I am the best candidate to fill a vacant seat on the Special Council because my real world experience gained over many years is uncommon in the web3 space. We are indeed 'still early' and where innovation and entrepreneurialism shines through in this wonderful web3 world of ours, governance, decision making frameworks and ethical leadership are relatively scarce.

My many years in growth focused positions will help to reframe the objectives of the foundation and unlock meaningful proposals which result in expansion of the DAOs efforts and relevance.
