

How to deploy a contract with a Portal

- Deploy to L1 using Viem, Foundry or your preferred tool;
- Deploy to L2 passing in the address of the L1 portal as its portal contract;const
- deploymentTx
- =
- Contract
- .
- deploy
- (
- wallet
-)
- .
- send
- (
- {
- portalContract
- :
- tokenPortalAddress
- ,
- }
-)
- ;
- Initialize l1 with l2 address for access control.

Follow the [token bridge tutorial](#) for hands-on experience writing and deploying a Portal contract. [Edit this page](#)
