

Introducing B-Harvest: Unleashing Cosmos with dYdX!

Greetings, dYdX community!

I am Tree from B-Harvest! Get ready to embark on an extraordinary journey with [B-Harvest](#). Since 2018, we're known as Validators, Market Makers, and Research Kings. With extensive experience in validating across 25+ mainnets, including Cosmos-Hub, Axelar, Osmosis, Sui, and Secret, we're here to bring our expertise to the dYdX Chain.

Validation is just the beginning. We're R&D enthusiasts, making technical contributions to the Cosmos ecosystem and beyond. Our focus on enhancing Tendermint Core, Cosmos-SDK, and exploring performance improvements for appchains sets the stage for collaboration to take dYdX v4 to new heights.

And let's not overlook our extensive trading experience. Allow us to introduce B-Harvest TaaS (Trading As A Service), born out of the synergy deriving from five years of blockchain research experience, TaaS is a powerhouse comprising four TradFi trading experts with a staggering combined experience of over 50 years. We've meticulously handpicked the crème de la crème, driven by our commitment to delivering unparalleled trading as a service for our partner DeFi protocols.

But that's not all. We're excited to join forces with dYdX to incubate and energize the Korean trading and dev community. Expert trading, innovation, and more await as we collaborate for mutual growth.

We have experience incubating [Crescent DEX](#) and believe in the paradigm shift dYdX will bring to Cosmos, elevating the DeFi experience and attracting a flourishing ecosystem. Get ready to revolutionize the game with B-Harvest. Together, we'll leave an indelible mark on Cosmos. Excited to be onboard, and let the adventure begin!

Thanks!
