

Rate Limits

In order to protect our services from abuse we have rate limits on the number of requests that can be made. Currently, the rate limits are set as follows.

rpc.flashbots.net

- Flashbots Protect RPC

Method Limit eth_sendRawTransaction None eth_call 200 / IP / 5 min eth_getTransactionReceipt 200 / IP / 5 min eth_getTransactionByBlockNumberAndIndex 200 / IP / 5 min eth_getBalance 200 / IP / 5 min All others 600 / IP / 5 min Note that you are not required to read JSON RPC requests to send transactions to Flashbots Protect RPC.

Relay rate limits for advanced user bundles sent to relay.flashbots.net [can be found here](#) .

Rate limiting exceptions

If you are a wallet or application integrating with protect and you require a higher rate limit please reach out to [Shea Ketsdever](#) .

Batch request support

Flashbots Protect RPC is not supporting batch JSON-RPC requests. [Edit this page](#) Last updated on Jan 14, 2025 [Previous](#) [Large Transaction Allowlist](#) [Next eth_sendPrivateTransaction](#)
