

Web3Auth PnP Web No Modal SDK

Web3Auth Plug and Play No Modal is the main SDK that consists of the core module of Web3Auth Plug and Play. This SDK gives you all the needed modules for implementing the Web3Auth features, giving you the flexibility of implementing your own UI to use all the functionalities. Since this package doesn't contain the UI Modal as compared to the [@web3auth/modal](#) package, the size of this package is smaller.

This Documentation is based on the 8.0.0

SDK Version. [@](#)

Requirements

- This is a frontend SDK and can only run in a browser environment
- Basic knowledge of JavaScript
- Supports all major JavaScript Frameworks, Libraries and Bundlers
