Specification

This MIP102c2 Subproposal does not seek to amend Article 1 of a Scope Bounded Mutable Alignment Artifact. It is thus considered a General Edit. An MIP102c2 General Edit cannot modify Article 1 elements.

Motivation

This subproposal aims to clarify for MKR holders their portion of SubDAO tokens, 25%, and the vesting schedule through which they will receive them. No specific technical implementation is prescribed, allowing flexibility in implementation details.

MKR holders fund the development of the initial product a SubDAO manages, MKR holders allocate funds or governance powers to the SubDAO, and MKR holders deserve a stake in SubDAOs after bearing that risk and outlay of resources.

Simultaneously, the MKR holder vesting schedule is more conservative than the farming emissions schedule, preventing immediate selling by existing MKR holders relative to farmers. The net effect is a marginally slower rate of SuDAO token inflation, because MKR holder vesting pushes some emissions further into the future in an effort to give MKR holders longer-term incentives. This also preserves the original intent for farming rewards to dominate emissions early in the SubDAO's history, since they follow a halving-style emissions schedule.

Amended MIPs and Components

MIP101 Sections 4.3.12.2 and 4.3.13. If other MIP102c2 amendments are being voted upon in the same monthly cycle as MIP102c2-SPXX, then MIP102c2-SPXX overwrites any other amendments passed concurrently for MIP101 Sections 4.3.12.2 and 4.3.13.
