

Hi,

I am very new to this stacking system

, if I understand correctly once I decide to undelegate my SCRT the validator will only return my coins after 20 days or so. I have two questions:

1. Does it imply that the coins will still be “earning” interest during this period or not?
2. Does undelegate mean the same as unstack? Or may I change the delegation without unstacking and waiting the whole 20 days ?

Thank you very much for this great development and for having an open forum.
