

Title:

[ARFC] Onboarding ETHx to Aave V3 Ethereum

Author:

[@0xTogbe](#) - Aave Chan Initiative

Date:

2023-11-27

Summary

This ARFC proposes the addition of the liquid staking token ETHx from Stader to Aave V3 Ethereum to enhance LST liquidity and asset diversity.

Motivation

ETHx represents Stader's staked ETH, providing users with liquid staking benefits. Supporting ETHx on Aave V3 continues our advocacy for LST diversity, complementing existing assets like stETH, cbETH and rETH.

Specification

Contract Address:

ETHx - [0xA35b1B31Ce002FBF2058D22F30f95D405200A15b](#)

Next Steps

1. Solicit feedback from the Aave community.
2. If community sentiment is favorable, proceed with the ARFC snapshot.
3. Success in the snapshot leads to the development of an AIP.
