

Considering the submission of the AIP 11 following the ongoing conversation here [Aave Protocol V1 -> V2 migration tool and transition plan - #26 by Emilio](#)

i propose, if the AIP 11 gets executed successfully, that a refund mechanism is implemented for V1 borrowers to incentivize the migration to Aave V2.

For the purpose, i believe that one time refund of 3 stkAAVE/user could be allocated from the AAVE ecosystem reserve for all the borrowers/liquidity providers that use the migration tool to move their positions from V1 to V2. The refund would only be claimable by users that borrowed before a certain date, to avoid potential abuses.

Curious to hear the community opinion on this
