

Based on discussions on Discord, Telegram, and the weekly Governance call I'd like to propose increasing the minimum deposit required for a proposal to go into the voting period to 1000 SCRT. In proposal #32

([Proposal 32: Param Change : Lower minimum proposal deposit amoun](#)) this parameter was reduced from 1000 SCRT to 100 SCRT.

Over the past week we have seen the first scam proposals hit the chain (proposals #133 to #140

so far), of which two also went into the voting period. By increasing the minimum deposit parameter to 1000 SCRT we will hopefully make it so that it is no longer financially interesting to create these scam proposals. Alternative solutions are concurrently being explored but this should be a good first step.

The main drawback seems to be that this will make it harder for new community members to make a proposal themselves. This should be mitigated by the fact that many in our community are willing to put a good proposal on-chain for another community member.

Vote 'Yes' if you'd like the deposit required to move into the voting period be increased to 1000 SCRT.

Vote 'No' if you'd like the deposit to remain at 100 SCRT.
