

For Clarity:

- What is the phase after the 1 month admin review called?
- What is the max number of days the AIP sits in that phase?
- Is the duration to sit in this phase unknown?
- Who picks which AIP goes to vote from the ones in this phase?
- If it's SC, can we get data on which SC picked how many and which during this year?
- If it's not picked for 1 month plus, can we get the reasons why?
- Can we make this phase public so authors know the progress?
- If SC had 1 month to review the AIP in admin review, what is taking so long? (and no, the answer is not the current AIPs in pipeline)
- Can we get data on which SC reviewed how many AIPs during admin review?
- How can we save time on this phase and reduce the number of days?
- How can we give accountability to this unknown phase?
- How to make the current SC actions more transparent?
