

To increase resiliency within the transactional structure for Andromeda, we would like to introduce Wintermute, StoneX and Computershare as additional third-parties and relationships for TACO Foundation. Onboarding with these parties will introduce redundancy amongst the Exchange Agent and Custodial Accounts for the continued acquisition of Treasuries in the Andromeda vault (RWA015).

Wintermute Trading Ltd. ("Wintermute") is a global digital assets trading firm founded in 2017. Wintermute offers OTC access for conducting trades. TACO Foundation would like to engage Wintermute as a potential Exchange Agent within Project Andromeda for conversion of stablecoins into fiat, vice versa.

StoneX (formerly known as INTL FCStone) provides institutional-grade prime brokerage services, clearing and execution services enabled by digital platforms. Pursuant to a Prime Brokerage Agreement, StoneX will serve as the Broker and oversee the custody of the U.S. Treasuries by the Custodian, Pershing LLC. TACO assets held at StoneX and Wedbush will be held in an account in TACO's name and segregated from firm assets.

Computershare is a global financial services company that provides custodial services for traditional finance assets. Pursuant to a Custodial Agreement, Computershare will hold TACO's assets in an account in TACO's name and segregated from firm assets.

The DAO Resolution to be voted on that will enact the onboarding of the above mentioned third-parties can be found here: [DAO Resolution Link](#)
