

here is a repo that provides some good sources for using GAN to generate synthetic data:

[github.com](https://github.com)

**[GitHub - BorealisAI/private-data-generation: A toolbox for differentially...](#)**

A toolbox for differentially private data generation - GitHub - BorealisAI/private-data-generation: A toolbox for differentially private data generation

Haven't tried this out though, I nearly used the Pate-Gan model in one of my work projects previously, but in the end didn't bother.
