

# Sample Subgraph Queries

The following queries can be swapped into the query variable in the [Subgraph Query in Python](#) example to fetch the indicated data.

Strategies Sample Query

```
...
```

Copy

## The Graph query

```
query="""
```

```
{ strategies(first: 10) { id order0 { A B y z inputToken { symbol } outputToken { symbol } } token0 { id } token1 { id } order1 { A B y z inputToken { symbol } outputToken { symbol } } owner { id } } }
```

```
...
```

Pairs Sample Query

```
...
```

Copy

## The Graph query

```
query = """ { pairs { token0 { symbol } token1 { symbol } } } """
```

```
...
```

Trades Sample Query

```
...
```

Copy

## The Graph query

```
query = """ { trades { sourceAmount targetAmount sourceToken { symbol } targetToken { symbol } tradingFeeAmount transactionHash blockNumber } } """
```

```
