

Hey Guys,

Seems like there are a lot of Defi Apps on Arb, do you have a list?

I have seen a few, but probably miss many.

Furucombo - DeFi aggregator, Lending + Flashloans.

StakeDao - Non-custodial liquid staking platform focused on governance tokens

Ondo - institutional-grade, blockchain-enabled investment products and services + Lending.

Flamedefi - Decentralized financial services, provide discounts and privileges + Staking

++++

Feel free to list good projects.

Happy easter
