

Bridges

Bridges facilitate cross-chain transfers and interoperability between different blockchains. Key bridges for Sei are:

- Squid
- : Enables one-click cross-chain swaps across various EVM blockchains.* [Squid\(opens in a new tab\)](#)
- Wormhole
- : A popular bridge for transferring assets across multiple blockchains.* [Wormhole\(opens in a new tab\)](#)
- Axelar
- : Provides secure cross-chain communication for Web3.* [Axelar\(opens in a new tab\)](#)
- Stargate (coming soon)
- : Facilitates seamless cross-chain transactions.* [Stargate\(opens in a new tab\)](#)
