

What does Powered By ApeCoin mean to you?

What do you consider to be a Powered By ApeCoin project?

Would you support a project that is Powered By ApeCoin (other than Yuga games)?

Would you buy a product or use a service that accepts payment in ApeCoin?

Are you willing to spend your ApeCoin on anything other than Yuga games or BAYC merch?

Think about those questions for a minute. Answer them in the comments if you feel so inclined.

I've noticed that not too many people are willing to part ways with their ApeCoin. Most see it as an investment and just want to hodl and watch "number go up".

This means that projects or businesses adopting and integrating \$APE as a payment method will get little support from the direct community, and doing so may hinder their sales volume and growth as it creates extra friction for normies.

How about we all get together to support these businesses that actually adopt ApeCoin as a payment method by buying their products and using their services. If we won't do it then who will?

Also if the businesses don't have any revenue because nobody wants to spend their ApeCoin, and people keep asking them how to pay with fiat instead, they will simply stop accepting ApeCoin as it is just hurting their business.

Lets make a list of businesses that are Powered By ApeCoin.

If you or anyone you know has integrated and accepts \$APE as a payment method post them in the comments or reach out to them and have them come here and post their business in the comments.

Let's spend some of that hard earned \$APE. Let's put it to use and get it circulating. Mint something, buy something, hire someone LFG \$APE!
