

Hi Everyone,

TL;DR

We're building an opensource multi-client cloud-agnostic Blockchain infrastructure deployer to solve the client-diversity issue

by helping node operators run client-diverse self-managing self-healing networks with little Ops knowledge.

[Medium – 28 Sep 20](#)

## **Multi-client Ethereum networks**

kotal is an opensource multi-client cloud-agnostic Blockchain Kubernetes Operator that makes it easy to deploy highly available...
