

[dYdX presents - DAO Talk in Tokyo]

Hello, this is Murphy, a Japan-based delegate for dYdX. On June 16th, I had the privilege of organizing an event titled “DAO Talk in Tokyo” with the support of the dYdX Community Cauldron (a special thanks to Alexios). The goal of this event was to familiarize the Japanese audience with the transformative potential of DAOs and to boost Japanese participation in dYdX DAO's governance. The event was divided into two main segments. First, a session where me and Hisashi from the dYdX Foundation explained the workings of dYdX. This was followed by a keynote panel featuring Leomaru | dYdX Foundation, ryota from Nagoya Blockchain, Tommy from Kawaii GirlNFT, and Crypto BBQ from Stepn. [Results] 55 attendees. My tweets garnering over 200K impressions and 10,000 engagements, with the announcement tweet alone reaching 140K impressions and attracting 8,300 engagements. [Observation] While I'm a trader by profession, I see the dYdX DAO as a platform for more than just trading. It's a place where anyone should feel welcome to participate and express their views freely. In this vein, it's crucial that we continually introduce new perspectives and values to the dYdX DAO. I believe that “DAO Talk in Tokyo” served as a step in this direction. In the real world, despite our desires for freedom, usefulness, and success, many of us often find ourselves unsure of the path forward, lacking a supportive community, or challenged by our geographical circumstances. However, in the virtual realm, barriers of race, location, age, appearance, and gender dissolve. Here, like-minded individuals can join forces through DAOs, overcoming hurdles collectively and carving out livelihoods. My hope is that more people discover fulfillment through such collaborative efforts. In my role with dYdX, an increasingly decentralized community, I am committed to spreading this message and illuminating its potential to help create a more equitable world. Below are a foto and video from the conference. Thank you for everything.

Best regards

Murphy
