

## LI.FI Widget Overview

Cross-chain bridging and swapping solution LI.FI Widget is a set of prebuilt UI components that will help you integrate a secure cross-chain bridging and swapping experience that can be styled to match your web app design perfectly and helps drive your multi-chain strategy and attract new users from everywhere.

Widget features include:

- Support of all chains, bridges, and exchanges supported by [LI.FI SDK](#)
- Integrated Bridge Insurance and LI.Fuel support
- Embeddable variants - standard, expandable, and drawer
- Ability to allow or deny certain chains, tokens, bridges, and exchanges
- Preview the quote even before connecting the wallet
- View of transactions in progress and transaction history (stored locally)
- Route settings for advanced users (stored locally)
- Wallet management UI with the ability to use your own
- Custom theming with dark mode support so you can match the look and feel of your web app
- Complete UI translations to match your customer's preferred language
- Compatibility tested with React, Vue, Svelte, Next.js, Gatsby, Vite, CRA
- 

Check out our [LI.FI Playground](#) to play with customization options in real time.

As an integrator, you can monetize your LI.FI Widget integration and collect fees. See our [monetization guide](#) for more information. Contact our [business partnerships team](#) to discover how you can partner with us and integrate [LI.FI](#) into your platform.

You talked me into it, so what now?
