

How to remove liquidity

1. There are two places you can remove liquidity from a position within Liquidity Terminal
2. , in both locations clicking on the Vertical Ellipsis (:)
3. button of the position you wish to remove liquidity from will open a submenu (image 1).
4. ?
5. These locations are:
6.
 1. In the [Positions](#)
7.
 1. area of the Market Explorer (see [Market Explorer Navigational Chart](#)
8.
 1.).
9.
 1. In the [Portfolio Positions](#)
10.
 1. area of your Portfolio (See [Portfolio Navigational Chart](#)
11.
 1.).
12. 7.
13. In both cases the menu is the same, select Remove Liquidity
14. (image 2).
15. ?
16. The Remove Liquidity Overlay will open, you can remove liquidity in several ways...
17. By entering the amount you want to remove in one of the fields under Amount to remove
18. (image 3):
19. ?
20. By entering the balance you wish your position to be reduced to in one of the fields under Final balance
21. (image 4):
22. ?
23. By typing the percentage of the liquidity you wish to remove in the central field (image 5).
24. ?
25. In each case the number of tokens deposited will automatically adjust to match the required ratio for your position.
26. Once you are satisfied with your values, click Withdraw
27. (image 6).
28. ?
29. If you enter values that result in all your liquidity being removed, or select Max in any of the pictured locations (image 7)...
30. ?
31. ...instead of seeing the Withdraw
32. button (image 6) you will see a Close Position
33. button (image 8).
34. Once you are satisfied click Withdraw
35. (or Close Position
36.), review details in your wallet and confirm.
37. Removal Complete!
- 38.
