Hey guys, our SEFI staking contract is now live @[btn.group](#)

We've crunched the numbers and compounded a minimum of once a day earns you more than 5 times the amount of SEFI over a year compared to just leaving it there. So at the current APY of 356% on Secret Swap earn, via the yield optimizer that would become > 1780%!

We are releasing the LP staking contracts soon.

Let me know if you have any questions.

Steve
