

[ARFC] Onboard wrsETH and WBTC to ZKsync V3 Instance

Author: ACI

Date: 2025-01-20

Summary

This is an ARFC to onboard wrsETH and WBTC to the Aave V3 ZKsync Instance allowing Aave users to supply wrsETH and WBTC as collateral. This proposal will be under Direct to AIP, as rsETH and WBTC are already on other Aave Instances.

Motivation

In order to benefit from the ongoing ZKsync Ignite incentives program, we propose onboarding assets which have proven popular on other Aave instances and are either whitelisted for Ignite incentives, or are good candidates for future whitelisting.

wrsETH is currently the only whitelisted liquid restaking token on ZKsync and has proven popular on the Aave Prime instance, therefore we believe should be onboarded to the Aave Instance on ZKsync too.

Similarly, WBTC has recently been whitelisted for Ignite incentives, is popular on the Aave Core instance, and is the largest BTC-backed ERC-20 token by market cap. We believe ZKsync users can benefit from being able to borrow against their WBTC and earn incentives at the same time, therefore we propose it should also be onboarded to the Aave ZKsync Instance.

Specification

Contract addresses:

rsETH: [0x6bE2425C381eb034045b527780D2Bf4E21AB7236](https://etherscan.io/address/0x6bE2425C381eb034045b527780D2Bf4E21AB7236)

WBTC: [0xBBeB516fb02a01611cBBE0453Fe3c580D7281011](https://etherscan.io/address/0xBBeB516fb02a01611cBBE0453Fe3c580D7281011)

Risk Parameters:

Risk Parameters will be provided by Risk service providers during the ARFC phase and this ARFC will be updated accordingly.

Disclaimer

ACI is not directly affiliated with the issuers of the assets mentioned in this proposal and did not receive compensation for creating this proposal.

Next Step

1. Publish a standard ARFC, collect community & service provider feedback before escalating proposal to AIP.
2. Publish an AIP vote for final confirmation and enforcement of the proposal.
