

- Organization name:

StakeLab

- **Organization website:** <https://stakelab.fr/>

- Organization Github:

zdeadex

- Organization social channels:

Twitter: <https://twitter.com/StakeLab> / Telegram: Contact @zdeadex

/ Channel: stakelab_fr

- Organization location:

France

- Organization size:

1-5

- Brief description of organization:

The StakeLab is the first French-native-speaking validator ready to support you in your decentralized investments

- Brief description of performance track record:

The StakeLab is running on 7 networks for few months and growing quickly. Uptime is almost 99%+ on all networks (only less during maintenance).

- Overview of supported networks:

Sentinel, Iris Network, Persistence, Certik, Starname, Fetch.ai, Bitsong, Ki Chain (Mainnet) - Desmos (Testnet) - Regen Network (Inactive waiting delegation - synched)

- Motivation for application:

Liquidity solution are a new and optimistic long term valuation in the ecosystem. We believe it will has a strong place in the ecosystem soon (and already is).

- Security set up for ETH staking:

multiple cloud and physical backup architecture, anti ddos, technical help 24/24. Monitoring alert.

- History of participating in ETH testnet:

Didn't participate in ETH testnet since we launch 2 months ago. But already know how this works.
