

The curve peg is getting worse by the day and not many new stETH are being minted at all since its better for people to just convert eth > stETH rather than staking ETH on Lido.

If we increase LDO rewards for stETH/ETH curve LPs, it would solve the peg problem and also incentivize new ETH to be staked directly with Lido.

I propose we add another 5,000,000 LDO rewards to the remainder of this month's curve LP rewards.
