## Overview

Our governance team at she256 carries out our nonprofit's broader mission of increasing diversity in the crypto space, while specifically striving towards increasing [empowerment, equity, accountability, and democratic access](#) in governance.

she256 fundamentally believes that blockchain technology will shape our future financial and governance structures. We exists to help build these systems so they are representative of the global, diverse population which they intend to serve.

We see Uniswap as a core functionality for users both on Ethereum and across chains. It provides a safe, secure and mature platform, which caters for both experienced users and newcomers. By providing a crucial service to all users, we believe Uniswap provides an equitable experience.

## Skills and areas of expertise

Our core governance team represents a wide range of expertise: we're made up of engineers who focus on protocols, Ethereum infrastructure, smart contract engineering, and ecosystem developers, as well as investors and legal and policy expertise. The she256 team as a whole comprises of individuals active in web3, contributing to projects and entities such NEAR, Celo, Oryn, Variant, Union, Metamask, Orca, Gitcoin, and many more.

## What voters can expect of us

- Consistent participation in discussions and thoughtfulness around voting
- Governance participation aligned with our core governance values of Equity, Accountability, Democratizing Access, and Empowerment
