

Was also going to post a suggestion for a way to get back to the main site. A way is needed to get to forum

top level, and currently both the logo and NUMERAI achieve this. A change could be to link the logo to the main site, link NUMERAI to the forum as it is now, and perhaps use a small superscript forum

badge after NUMERAI to distinguish it from the main site and to reinforce that clicking would be to the forum. The general navigation concept would be that the logo always takes you to the main site, whereas NUMERAI plus a badge takes you to the top level of whatever the badge relates to, such as NUMERAI signals

, NUMERAI forum

etc.
