

Hi,

I run Dapnode with Nimbus. My fee recipient is set to Lido EL Rewards Vault (0x388C...) in the Web3signer, but since the last update there seems to be an issue with the fee recipient being set to the one specified in the client config instead of the ones from the Web3signer.

This resulted in my validators proposing two blocks with the wrong fee recipient address:

Block 21361349 and 21363403

[@dgusakov](#) reached out and the CSM committee proposed me to return the wrongly acquired EL rewards without additional penalties by sending them to the EL Rewards Vault: 0x388C818CA8B9251b393131C08a736A67ccB19297

The total acquired rewards are:

$0.047682469603249899 + 0.137639774862815918 = 0.18532224446606582$  ETH

They have already been returned to the EL Rewards Vault via the following Txn Hash:

0xb602ef9bd6e59dabaca3f2b60d26482b2b20a2a4b8748358019a1a9a235b1084

Since there is no straightforward fix to this issue in Dapnode, I'm awaiting an update from Dapnode team and will return any additional block rewards if they happen in the meanwhile.

Thank you
