

Testing your Integration

To test your integration, we provide the [Worldcoin Simulator](#) to simulate a user using World App in a staging environment.

You can use the simulator from another browser tab and copy the QR code from IDKit with a single click:

Your browser does not support the video tag.

And then paste the QR code data into the simulator:

Your browser does not support the video tag.

You should see a successful outcome in IDKit!

Your browser does not support the video tag.
