

Megan V joined SNF in mid-October to assist with SNF's position in the community, including communication, efficiency, and accountability, and also to help with back office processes.

Outside of her past year off (spending time with her newest addition

), Megan has spent the last 8 years in the crypto world, most notably leading the Customer Support Operations for ShapeShift and assisting them in decentralizing their organization into the ShapeShift DAO. She's proficient in the governance process, crypto and DeFi use, and has a strong personal network in the web3 space. Megan's experience in decentralized orgs and crypto makes her a huge asset to SNF as we prepare to scale up the ecosystem in a time when confidential computing is at the center of many conversations.

Her passion lies in people and communication. Her goals are to help professionalize the organization in a way that best suits our ecosystem and ensure talent and resources are optimized.

Please join me in welcoming Megan to our community!
