

Hello,

I am having issue withdrawing SCRT on an exchange, Yobit. It's saying wallet maintenance (see screenshot below). When I contacted their support, the following is what they told me:

Deposit\Withdrawal coin will be available after you upgrade the source code of the wallet.

Contact the developer to update the wallet and send it to us and we will promptly solve the problem.

Please I need help getting the source code for the wallet.

Thanks.
