

Troubleshooting

Before creating an issue with EigenLayer support please check this page to see if you can resolve your issues. If you are still stuck, please create a support ticket

Getting "no contract code at given address"

If you are getting this issue then either you are using a wrong rpc in your [operator.yaml](#) file or you have wrong smart contract address in your [config](#) .

- Please make sure you have correct rpc (goerli rpc for goerli nodes, mainnet rpc for mainnet) and is also accessible via your machine
- Please find the correct smart contract addresses [here](#) [Previous Operator FAQ](#) [Next Restaking User Guide](#)
