

# Queries

## [pausable\_query]

pub

enum

QueryMsg

```
{ /// The contract's configurations; returns [Config] Config
  {} ,
  /// The contract's current stats; returns [StatsResponse] Stats
  {} , }
```

## Config

Returns current reserve contract configuration. Returns an object with following schema:

pub

struct

Config

```
{ /// Distribution rate (0-1) which goes to distribution contract pub distribution_rate :
  Decimal ,
  /// Address of distribution contract, which will receive funds defined but distribution_rate % pub distribution_contract :
  Addr ,
  /// Address of treasury contract, which will receive funds defined by 100-distribution_rate % pub treasury_contract :
  Addr ,
  /// Minimum period between distribution calls pub min_period :
  u64 ,
  /// Denom of the main coin pub denom :
  String ,
  /// Address of the Neutron DAO contract pub main_dao_address :
  Addr ,
  /// Address of the security DAO contract pub security_dao_address :
  Addr ,
  // Denominator used in the vesting release function pub vesting_denominator :
  u128 , }
```

## Stats

Returns contract coins distribution stats. Returns an object with following schema:

pub

struct

StatsResponse

```

{ /// Amount of coins distributed since contract instantiation pub total_distributed :
  Uint128 ,
  /// Amount of coins reserved since contract instantiation pub total_reserved :
  Uint128 ,
  /// Total amount of burned coins processed by reserve contract pub total_processed_burned_coins :
  Uint128 , }

```

## PauseInfo

Returns pause state info. Returns an object with following schema:

pub

enum

PauseInfoResponse

```

{ /// Contract is in paused state untiluntil_height chain height Paused

```

```

{ until_height :

```

```

  u64

```

```

} ,

```

```

/// Contract is not paused Unpaused

```

```

{ } , } Previous Messages Next Overview
