

Dear Lido Community,

welcome to our monthly news where we keep you up to date about our activities to create a safe Ethereum environment.

## HARDWARE

We both fixed another hardware issue and extended our hardware for better resilience, no impact on Lido operations.

## OBOL

After having started an Obol mainnet cluster in August, the Obol mainnet validator went live 14th of September. Everything looks good so far and we are curious to see Lido on Obol.

## HOLESKY

We are already doing Holesky preparations to be able to participate in Lido on Holesky.

## ISSUE WITH NIMBUS

We found update issues with Nimbus and fixed some of them, but so far could not locate the source of the problem. We will investigate this further.

## LIGHTHOUSE ISSUE

After updating VC to 4.4.1 it wouldn't do the liveness check properly and therefore get stuck in doppelgaenger. Issue has been fixed.

## WELCOME NEW NODE OPERATORS!

Also, we want to welcome the new NOs who recently joined Lido and wish you a lot of success in our joint effort to make Ethereum a safe environment!

Thank you for your interest in our work!

Roland for the RockLogic Node Operator Team
