

Hidden Gems

Quick breakdown of additional tools to use for development There are many tools created by various ecosystem contributors. These tools can be incredibly useful in different situations.

If you have a tool that you think could be added here, let us know on [GitHub](#) or [Discord](#) !

- <https://scrthost.xiphia.com/txdecrypter/>
- <https://snip20history.trivium.network/>
- <https://permits.scrtlabs.com/>
- <https://bech32.scrtlabs.com/>
- <https://scrthost.xiphia.com/>
- Collection of awesome things related to [CosmWasm smart contracts](#)
- .
- <https://github.com/scrtrlabs/CosmWasm-Simulator>
- - Simulator for CosmWasm transactions. Helpful when trying to debug on-chain behavior
- [Smart Contract Interface](#)
- - Browser interface for smart contracts by [btn.group](#)
- [Panic](#)
- - Monitor a validator on the Secret Network with an active telegram bot, email or phone call through Twilio
- [Secret Contract code verifier](#)
- - Tool to verify the WASM public binary of any contract against its source code. Make sure live contracts do what the Git repo says they do. [Previous Fadroma - SC framework](#) [Next Other](#) Last updated 10 months ago
