

Introducing [Deffo.xyz](https://deffo.xyz)

View info concerning Uniswap governance

features:

- List of top delegats
- Voting history of every delegate
- see every vote for each proposal
- View delegate and delegates for every address
- ...

Todo:

- clean up UX
- show diagram of where delegates vote come from
- Add nickames and info of delegates
- Automate site buidling

I'm a also working on a telegram bot to signal new vote and snapshot votes.

This project is currently very wip but all info should be correct. Hosted on ipfs so the site itself is also decentralized. If you have any feedback or feature requests feel free to share
