

Hello,

We wanted to notify the community of the cancellation of the unvested DAI budget from the old SF-001 DAI budget stream of 247,200 DAI.

When the new Steakhouse Budget was implemented on 3/31/23, prior stream was not cancelled and instead continued to accrue until 6/30/23 at which point the stream ended. This resulted in 247,200 DAI that was accrued but not claimed.

We have cancelled the stream thanks to the guidance from [@Patrick\\_J](#) and the claimable DAI has been reduced to zero as can be seen on [makerburn](#). There is no impact on the SB due to the DAI being minted/burned through the cancellation.
