

January 2022

1/6/2022

- We are consolidating parts of OpenMEV SDK and some internal utilities into a new monorepo [GitHub - manifoldfinance/disco3-react: disco3 - well typed and performant web3 react library](#)
- Announcing (soft) @disco3
- web3 react / Ethereum Frontend library. We will be using this going forward to help onboard new projects for OpenMEV / etc.
- We have gone over the results of our stress testing with the Sushi team and expect our integration to land into production before this Thursday.
- Due to mishandled errors - some users lost their FOLD tokens. A community vote will take place this Thursday during our community call. Our community call is scheduled for 3pm PST.
- Roadmap: We have been using GitHub Projects Beta for a month and really like it, so we are expanding its usage for public use. Over this week we will be adding private issues/milestones to the public project board so you can see our Roadmap and status on milestones in real time as its tracked by development. [Manifold Public · GitHub](#)
- Multichain: We are in preliminary preparation for expanding onto Avalanche Network.
- New CEO: we plan on announcing a revamped internal org structure that will no longer see a title of CEO and more accurately reflect our Partner structure. The new approximate title will be 'Managing Partner'; we expect to announce this before the end of the Month.
