

Considered.Finance presents the financial intelligence report for epoch 22.

[Financial Intelligence Report Epoch 22](#)

Those interested in clearly defined measures of performance of the protocol and the DAO will find this an interesting read. It contains details over the volumes and fees going back to epoch 1, specifics over all service provider contracts with the DAO and more. As always feedback, comments or constructive criticism are strongly encouraged.

Some stand out metrics and changes we feel worth highlighting here are:

Slight drop in dollar volumes and fees in line with a gradual price drop over the epoch. Reduced open interest, but quicker OI turnover confirms this in our eyes that traders struggled with the change in market trend.

dYdX - Financial Report 22 (5)

960×540 97.3 KB

](<https://europe1.discourse-cdn.com/standard21/uploads/dydx/original/1X/63dfa6b9790780c8d102b022e4000a70ccfdef69.png>)

9.5 Years runway at current spending, although we expect this to change significantly over coming epochs as subDAO structures form.

We've overhauled the section on the DYDX token to provide some useful metrics. This data is also available in real time now at: <https://dune.com/consideredfinance/dydx-token-flows>

Whales accumulating:

[

](<https://europe1.discourse-cdn.com/standard21/uploads/dydx/original/1X/83576d60f38ec9220706d371359dbbd3d92cd655.png>)

Rewards dumping, but not matching the timing of price moves:

[

dYdX - Financial Report 22 (8)

960×540 83.6 KB

](<https://europe1.discourse-cdn.com/standard21/uploads/dydx/original/1X/d5ded79030127fdca846c4fe3641b1f592342b85.png>)

DEX liquidity improving, but flows not keeping up.

If you find this interesting please let us know what you like, what's missing and what you don't like. Reporting for DAO's is still nascent, and there is definitely no standard model for reporting perpetual exchange metrics. We'd like to continue improving this, making DYDX a leader at reporting and DAO intelligence.
