

Hello Apecoin Community,

Thanks to everyone who casted their votes, i highly appreciate the support and critics. I am trying to look into the reasonings behind the members who voted “against” to improve, discuss and clear any confusion if there is any. Also, for the people who posted messages that the requested amount is a lot, they need to look into the actual impact and see for themselves how far it has saved users funds on the dune dashboard: 10% of the funds affected is commonly used in bug bounties programs so it's nothing new to the scene, I was able to quantify the impact that saves users on loss of funds upfront that what sets the difference.
