

# Goaccess

Goaccess is a powerful tool when it comes to providing usage statistics for your endpoints.

This tutorial will guide you through configuring Nginx for logging, anonymizing logs, monitoring web traffic with GoAccess, and setting up log rotation for Nginx logs.

This guide is intended for intermediate users who are familiar with Linux, Nginx, and using the command-line interface.

1. [Install Goaccess](#)
2. [Setup Goaccess](#)
- 3.
