

# RPCs

Public RPC endpoints are available for the Filecoin mainnet.

[Chainlist](#) contains a dynamically updated list of available Filecoin RPCs [Find out more at chainlist.org's Filecoin listings](#). These endpoints are limited to [read-only Filecoin JSON RPC API calls](#) and [MPoolPush](#) for sending messages that have already been signed.

## [Ankr](#)

- [HTTPS:https://rpc.ankr.com/filecoin](https://rpc.ankr.com/filecoin)
- [Supported Filecoin API methods](#)
- 

## [ChainupCloud](#)

- [HTTPS:https://filecoin.chainup.net/rpc/v1](https://filecoin.chainup.net/rpc/v1)
- [WebSocket:wss://filecoin.chainup.net/rpc/v1](wss://filecoin.chainup.net/rpc/v1)
- [ChainupCloud documentation](#)
- 

## [Glif](#)

Please note that publicly available hosted endpoints only guarantee 2000 of the latest blocks.

- [HTTPS:https://api.node.glif.io/rpc/v1](https://api.node.glif.io/rpc/v1)
- [WebSocket:wss://wss.node.glif.io/apigw/lotus/rpc/v1](wss://wss.node.glif.io/apigw/lotus/rpc/v1)
- Lotus lite-node command:  
`  
• Copy  
• `FULLNODE_API_INFO=wss://wss.node.glif.io/apigw/lotuslotusdaemon--lite`  
`
- When using a lite-node, omit/rpc/v1
- from Glif's WebSocket address.
- [Glif documentation](#)
- 

## [NOWNodes](#)

These nodes are available for free to users for the [first month](#), after which the user will have to pay to maintain access.

- [HTTPS:https://fil.nownodes.io](https://fil.nownodes.io)
- [NOWNodes documentation](#)
-
