

## Security First

We prioritize security over everything else. Explore our end-to-end security concept.

## Frequent Audits

We're auditing frequently and use a combinatory of public auditing (like [Code4rena](#) ) and private auditing firms like [Quantstamp](#) and [Spearbit](#) . Read up on [our audits](#) .

## Bridge Risk Assessment

We have a full-time researcher analyzing bridges in depth. We're publishing our results on our [blog](#) . Take for example this [40+ page arbitrary messaging bridge comparison framework](#) . We compare our results against public frameworks from sources like [L2Beat](#) , and work with companies like [Consensys on in-depth bridge risk assessment](#) .

## Asset Risk Assessment

In a multi-chain world, bridges also affect the overall asset risk. Thus, we partnered up with [Go+ Security](#) to enrich our supported assets with their token vetting information.

## SSL Encrypted Communication

Understand [the quality of our SSL encryption](#) . On-demand, we can also support custom certificates and encryption mechanics.

## Submission of Security Reports

Please contact our community team on [Discord](#) to learn how to submit security issues you found. Please provide enough information to allow us to verify the issue quickly.
