

Should Apecoin DAO buy NFTs/Tokens from other DAO projects or group that actively take part in DAO votes? for example regarding latest [@yatsiu](#) 's AIP idea where he talk about creating a sub DAO.

Similar to this, should Apecoin DAO also buy NFTs from Mocaverse and actively vote.

I'm guessing this would also encourage other projects outside the ecosystem to come and explore the DAO, buying \$ape as a community and vote hoping that Apecoin DAO would do the same, not equal exchange of votes but this would encourage more communities to enter the otherside here, just a thought
