

Ill vote no to any proposal unless 80% of the UNI delegated to me decides a certain vote is worth adopting. I'll use any validation system desired for your Yay or Nay vote, as long as it is is secure and anonymous. My philosophy is that any adopted changes must be overwhelmingly supported. Better to risk voting down a good proposal (which can be re-submitted) than risk voting up a bad proposal (which may be irreversible or may take time to fix).

"We fear change"

As stated below, when I receive 20 likes on here I will post my address that you can delegate to. You can read some of my comments to see my opinions and such.

Thank you
