

Set quotas

Control monthly quotas from your API key's settings page.

- Storage quota:
- maximum total storage, e.g: 0.001 GB.
- Data transfer UP quota:
- maximum data per month sent to the IPFS service, e.g: 0.001 GB.
- Data transfer DOWN quota:
- maximum data per month retrieved from the IPFS service, e.g: 0.001 GB.

info * A zero setting, i.e. 0.0, means you can't add any data. * A clear input means there is no quota.
