

Token Support

Blockscout supports the following token types:

- ERC-20: Fungible tokens
 - - Standard for interchangeable tokens
 - - Used for cryptocurrencies, stablecoins, utility tokens
- ERC-721: Non-fungible tokens (NFTs)
 - - Unique, indivisible tokens
 - - Often used for digital art, collectibles, game items
- ERC-1155: Multi-token standard
 - - Combines fungible and non-fungible tokens
 - - Efficient for gaming and complex ecosystems
- ERC-777: Advanced fungible tokens (basic indexing but no additional views, provides similar info to ERC-20)
 - - Adds features like operator support and hooks
 - - Backward compatible with ERC-20.
- ERC-4626: Tokenized Vaults (basic indexing but no additional views, provides similar info to ERC-20)
 - - Standard for yield-bearing tokens
 - - Used in DeFi for lending and yield farming
